Location: Kathmandu, Nepal **Portfolio:** (Scan QR Code)

EXECUTIVE SUMMARY

Results-driven Data Analyst with a strong foundation in Actuarial Science and advanced expertise in data engineering, business intelligence, and process automation. Adept at transforming complex datasets into highly interactive dashboards and automated reporting systems using Python, SQL, and Power BI. Proven track record of enhancing operational efficiency, uncovering actionable business insights, and supporting executive decision-making through rigorous data modeling and advanced analytics.

PROFESSIONAL EXPERIENCE

Data Analyst Dec 2025 - Present

MORE Group | Kathmandu

- Sales & Product Analytics:** Conducted comprehensive sales pipeline analysis using SQL and Power BI, identifying key revenue trends and top-performing products to strategically guide management decisions.
- Financial Tracking Systems:** Designed and deployed a robust Web-Based Ageing Analysis system (via Python/Render) that provided real-time tracking of accounts receivable, reducing payment delays through automated alerts.
- Process Automation:** Engineered automated reporting pipelines utilizing Python to extract, clean, and transform data, eliminating manual Excel entry and saving 15+ hours of weekly reporting time.
- Business Intelligence:** Developed interactive, KPI-driven management dashboards presenting actionable insights on inventory demand forecasting and profitability optimization.

Freelance Data Analyst May 2025 - Dec 2025

Self-Employed

- Data Modeling & Visualization:** Delivered end-to-end Power BI solutions for diverse clients, featuring custom DAX measures, dynamic Power Query transformations, and optimized Power Pivot data models.

CORE COMPETENCIES

DATA VISUALIZATION

Power BI

DAX

Tableau

Dashboards

PROGRAMMING & DATABASES

Python (Pandas, NumPy)

SQL (PostgreSQL)

Data Extraction

DATA ENGINEERING & ETL

Power Query

Power Pivot

Data Cleaning

Web Scrapping

ADVANCED EXCEL

Pivot Tables

VLOOKUP/INDEX-MATCH

ANALYTICS & BUSINESS

- **Database Optimization:** Authored complex, optimized SQL queries (incorporating subqueries, CTEs, and advanced joins) to drastically improve data extraction speed from legacy databases.
- **Python Automation:** Built Python scripts leveraging Pandas and NumPy to automate data cleansing workflows for large datasets, ensuring high data integrity for client deliverables.

Actuarial Intern

Nov 2024 - Mar 2025

Pivot Risks Pvt. Ltd. | Kupondole

- **Risk Analytics:** Assisted in comprehensive risk management research, analyzing historical datasets to provide quantitative support for ongoing actuarial projects.
- **Reporting Efficiency:** Processed high-volume datasets using Advanced Excel and Python, significantly improving the accuracy and turnaround time of internal audit reports.

KPI Reporting

Risk Management

Forecasting

Automation

EDUCATION

Actuarial Science

TU School of Mathematical Sciences

Graduated: Nov 2024

Relevant Coursework: Statistics, Finance, Accounting, Investment Analysis, Economics, Risk Management, Business Law, Insurance.

Hindi (Professional)

KEY PROJECTS

Automated Corporate Sales Dashboard

- Engineered an interactive intelligence platform using Python and Web Automation for tracking sales trends, forecasting, and performing RFM (Recency, Frequency, Monetary) customer segmentation.

Job Market Analytics Dashboard

- Analyzed large-scale job posting datasets utilizing Python (Pandas) to uncover market trends; visualized findings on an interactive Power BI dashboard highlighting demand, salary brackets, and skill requirements.

Python Web Automation System (Ageing Analysis)

- Developed a secure, automated data pipeline to extract, classify, and track accounts receivable ageing categories, enabling proactive payment follow-ups and improved cash flow visibility.
